Rigid's Design & Build

Large Format Billboard Construction at HK International Airport.

Rigid is proud to present the design and build project of an iconic large exterior billboard located at the Hong Kong International Airport.

Cooperated with JCDecaux Transport Team, Rigid conducted the project from presenting conceptual design, modular structure production to on site installation in 3 months time.

This iconic billboard is featured with contemporary architectural sense, large display area, simple but safe modular structure and a mechanic pulling system for easy banner installation.
